

MNEF Project Invitational Training Program at Yonsei University, KOREA

MNEF PROJECT is

**“Project for Education and Research Empowerment for
Tashkent Pediatric Medical Institute(TashPMI)”.**

This is an invitation training program
to provide opportunities to empower medical-pedagogical capacity and
to strengthen the research capabilities of professors and researchers
by sharing unique experiences and skills accumulated
at Yonsei University Health System with TashPMI.

A total of 20 trainees will be invited,
including 2 from medical education, 6 from nursing education,
6 short-term(3 months) and 6 long-term(6 months) from medical research.

In the field of medical research,
two trainees are to be selected each year over three years from 2023 to 2025.

In 2023, a total of 12 trainees will be selected through this process:
two from medical education, six from nursing education, four from medical research (two
for short-term, and two for long-term).

Director's Message:

The MNEF project aims to establish the basis for the continuous development of medical and nursing education and health care improvement in Uzbekistan by enhancing medical and nursing education, and research capabilities at the Tashkent Pediatric Medical Institute (TashPMI) and revitalizing industry-academic cooperation. This project is being carried out with the help of funds supported by KOICA in Korea, and the TashPMI in Uzbekistan and the Yonsei University Health System(YUHS) in Korea are collaborating.

To develop TashPMI human resources, we conduct the MNEF Fellowship, which invites promising TashPMI researchers, PhD candidates, lectures and professors to YUHS for medical & nursing education and clinical/basic research. When selected as a MNEF Fellow, you can conduct research related to your field of expertise at YUHS. Research proposals will be reviewed by MNEF Grant Selection Committee and we will be glad to support the grants.

Shinki An, MD, Ph.D., MDiv.

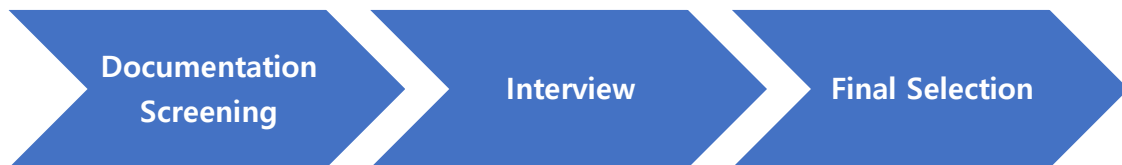

Director, Yonsei Institute for Global Health, YUHS

1. Program Overview

- 1) Training Period : September 2023 ~ Varies by Training Courses
- 2) Application Field : Medical Education / Nursing Education / Medical Research
- 3) Number of Trainee : 12 people in total (refer to the application details below)
- 4) Application Period : 17 ~ 31 March, 2023
- 5) Application Details

Course	Trainee	Period	Qualifications
Training for Medical Education	2	90 days	Master Degree or Higher
Training for Nursing Education	6	30 days	
Training for New Researcher	2	180 days	
Empowering Research Capability	2	90 days	PhD Degree or Higher

2. Selection Procedure

- 1) Documentation Screening
 - Submission of application : **by 31 March, 23:59**
- 2) Evaluation of applications
 - YUHS and TPMI joint selection committee reviews and selects 3 times more than designated applicants(6 persons) for each course except candidates for nursing education.
- 3) Interview
 - Interview schedule will be notified individually for those who pass the document screening.
 - Submission of documents for interview: Those who passed the document screening should submit a detailed 6-page research plan within 4 weeks after notification for candidates.
 - Interviews will be conducted by the YUHS-TPMI joint selection committee for 2 weeks after closing for submission of final research plan.

- Verification of language proficiency (English) during the interview.
- 4) Final Selection
- Selection of applicants including one reserve candidate for each training course.
 - Reserve candidate cannot participate in the training if there is no vacancy.

3. Requirements

1) Common

- Each researcher must carry out the research submitted in the application form during and after the training, and the results must be presented or published in international conferences or international journals.
- Adequate communication skills (English): English speaking/writing skills at a level suitable for conducting research and training.
- Applicants must not conflict with their personal or academic schedules during the training period.
- Applicants must be able to participate in the entire training schedule.
- Depending on the characteristics of each course, the training period may be slightly adjusted, and this is determined in consultation with the trainee.
- Have a willingness to show a high level of participation and commitment throughout the course and contribute to the capacity building of his/her organization after the completion of the program.
- Required documents for Visa and registration to YUHS must be prepared immediately after the final selection.

2) Training for Medical education

- Master Degree or Higher
- Those who conduct research/lecture in the field of medical education at TPMI after completion of the training course.

3) Nursing Education

- Master Degree or Higher
- Those who conduct research/lecture in the field of nursing education at TPMI after completion of the training course.

- 4) Training for New Researcher
 - Master Degree or Higher
- 5) Empowering Research Capability
 - PhD Degree or Higher

4. Benefits

- 1) Selected candidates will be matched with professors at Yonsei University Health System to conduct research projects.
- 2) Selected candidates will receive supports such as a round-trip flight, accommodations, visas, insurances, per diem including daily expenses and meal allowance, etc. during the invitational training program.
- 3) Selected research proposals will be reviewed by MNEF Grant Selection Committee and will be supported a designated grant. Selected research plans will be supported by YUHS.

5. Responsibilities

- 1) Selected candidates need to report their research progress regularly.
- 2) Selected trainees are obliged to comply with the 'Research Fund Execution Regulations'.
- 3) This is a project in cooperation with KOICA (Korea International Cooperation Agency), and all expenses related to the program come from the KOICA project. Thus, selected candidates must follow the safety guidelines stipulated by KOICA.

6. Application Form
